International Journal for

Numerical Methods in Engineering

Contents of Volume 56

7 January – 21 April 2003

Editors

Professor Roland W. Lewis
School of Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK (*E-mail:* G.Power@swansea.ac.uk)

Professor Ted Belytschko
Department of Mechanical Engineering, Northwestern University
Evanston, IL 60208, USA (*E-mail:* ijnme-us@northwestern.edu)

Associate Editors

Professor René de Borst
Koiter Institute Delft, Delft University of Technology
P.O. Box 5058, NL-2600 GB Delft, The Netherlands
(*E-mail:* ijnme@LR.TUDelft.nl)

Professor Charbel Farhat
Department of Aerospace Engineering Sciences, Center for Aerospace Structures, University of Colorado at Boulder, Campus Box 429, Boulder, CO 80309-0429, USA (*E-mail:* charbel@alexandra.Colorado.edu)

Founding Editors

Professor O. C. Zienkiewicz
Department of Civil Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK

Professor R. H. Gallagher†

Editorial Board

J. H. Argyris
Institute for Computer Applications, Stuttgart, Germany

J. S. Arora
University of Iowa, Iowa City, USA

I. Babuska
University of Texas at Austin, USA

K. J. Bathe
MIT, Cambridge, MA, USA

J. L. Batoz
Universite de Technologie Compiegne, Compiegne, France

Z. P. Bazant
Northwestern University, Evanston, IL, USA

M. P. Bendsoe
Technical University of Denmark, Lyngby, Denmark

D. Beskos
University of Patras, Greece

P. Bettess
University of Durham, UK

G. F. Carey
University of Texas at Austin, USA

J. L. Chenot
ENSM de Paris, Valbonne, France

Y. K. Cheung
University of Hong Kong

P. G. Ciarlet
City University of Hong Kong

R. W. Clough
University of California, Richmond, CA, USA

G. Comini
Universita degli Studi di Udine, Italy

J. Donea
University of Liège, Belgium

C. A. Felippa
University of Colorado, Boulder, USA

M. Géradin
ISIS, JRC, Ispra, Italy

R. Haber
University of Illinois at Urbana-Champaign, IL, USA

R. T. Haftka
Aerospace Eng, Mech & Eng Sci, Gainesville, FL, USA

T. K. Hellen
Oakfield House, Bristol, UK

T. J. R. Hughes
University of Texas at Austin, USA

S. Idelsohn
INTEC, Santa Fe, Argentina

T. Kawai
Science University of Tokyo, Japan

M. Kleiber
Polish Academy of Sciences, Warsaw, Poland

P. Le Tallec
Université Paris Dauphine and l'Ecole Polytechnique, Palaiseau, France

X. K. Li
Dalian University of Technology, People's Republic of China

W. K. Liu
Northwestern University, Evanston, IL, USA

G. Maier
Polytechnic of Milan, Italy

H. A. Mang
Technische Universität Wien, Austria

K. Morgan
University College of Swansea, UK

L. S. D. Morley
Brunel University, Uxbridge, UK

Z. Mroz
Polish Academy of Sciences, Warsaw, Poland

A. K. Noor
Old Dominion University, Hampton, VA, USA

J. T. Oden
University of Texas at Austin, USA

R. Ohayon
CNAM, Paris, France

J. Oliver
Technical University of Catalonia, Barcelona, Spain

E. Oñate
Universidad Politécnica de Catalunya, Barcelona, Spain

M. Ortiz
California Institute of Technology, Pasadena, CA, USA

K. C. Park
University of Colorado, Boulder, USA

T. H. H. Pian
MIT, Cambridge, MA, USA

E. Ramm
Stuttgart University, Germany

J. N. Reddy
Texas A&M University, College Station, TX, USA

K. Runesson
Chalmers University of Technology, Göteborg, Sweden

S. Saigal
Carnegie Mellon University, Pittsburgh, PA , USA

A. Samuelsson
Chalmers Tekniska Högskola, Göteborg, Sweden

B. Schrefler
Universita di Padova, Italy

M. S. Shephard
Rensselaer Polytechnic Institute, Troy, NY, USA

E. Stein
University of Hannover, Germany

R. L. Taylor
University of California, Berkeley, USA

N. P. Weatherill
University of Wales Swansea, UK

P. Wriggers
University of Hannover, Germany

G. Yagawa
University of Tokyo, Japan

Advisory Board

M. Ainsworth
University of Strathclyde, Glasgow, UK

M. H. Aliabadi
Queen Mary, University of London, UK

F. Armero
University of California, Berkeley, USA

D. J. Benson
University of California, San Diego, USA

M. A. Bradford
University of New South Wales, Australia

A. Combescure
LaMCos INSA de Lyon, Villeurbanne, France

J. Fish
Rensselaer Polytechnic Institute, USA

L. Franca
University of Colorado, Denver, USA

D. Givoli
Technion, Haifa, Israel

A. Huerta
Universidad Politecnica de Catalunya, Spain

G. M. Hulbert
The University of Michigan, USA

T. A. Laursen
Duke University, Durham, NC, USA

C. Miehe
Universität Stuttgart, Germany

J. Peraire
Massachusetts Inst of Technology, USA

D. Peric
University of Wales Swansea, UK

C. Schwab
ETH Zuerich, Switzerland

O. Sigmund
Technical University of Denmark, Lyngby, Denmark

P. Steinmann
Universität Kaiserslautern, Germany

K. K. Tamma
University of Minnesota, USA

E. Van der Giessen
University of Groningen, The Netherlands

L. C. Wrobel
Brunel University, UK

N. J. Zabaras
Cornell University, USA

International Journal for
Numerical Methods in Engineering

Volume 56 Number 1 • 7 January 2003

Moving kriging interpolation and element-free Galerkin method: L. Gu 1

Fully coupled non-linear analysis of piezoelectric solids involving domain switching: W. Zeng, M. T. Manzari, J. D. Lee and Y.-L. Shen 13

3D dynamics of discrete element systems comprising irregular discrete elements—integration solution for finite rotations in 3D: A. Munjiza, J. P. Latham and N. W. M. John 35

Adaptive damping for dynamic relaxation problems with non-monotonic spectral response: D. R. Metzger 57

Development of geometrically exact new shell elements based on general curvilinear co-ordinates: M. Cho and H. Y. Roh 81

New approaches for error estimation and adaptivity for 2D potential boundary element methods: A. B. Jorge, G. O. Ribeiro and T. S. Fisher 117

An evaluation of the Lyapunov characteristic exponent of chaotic continuous systems: S. Rugonyi and K. J. Bathe 145

Volume 56 Number 2 • 14 January 2003

A general non-linear optimization algorithm for lower bound limit analysis: K. Krabbenhoft and L. Damkilde 165

Stabilized finite element method for viscoplastic flow: formulation with state variable evolution: A. M. Maniatty and Y. Liu 185

Volume-dependent pressure loading and its influence on the stability of structures: T. Rumpel and K. Schweizerhof 211

A fast boundary cloud method for exterior 2D electrostatic analysis: V. Shrivastava and N. R. Aluru 239

Space-time finite elements and an adaptive strategy for the coupled thermoelasticity problem: F. Larsson, P. Hansbo and K. Runesson 261

Blurred derivatives and meshless methods: E. Pardo 295

LETTERS TO THE EDITOR

Comments on 'Eigenderivative analysis of asymmetric non-conservative systems' by S. Adhikari and M. I. Friswell (*International Journal for Numerical Methods in Engineering* 2001; **51**:709–733): M. Jankovic 325

Authors' reply to "Comments on 'Eigenderivative analysis of asymmetric non-conservative systems'": S. Adhikari and M. I. Friswell 329

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

Volume 56 Number 3 • 21 January 2003

Adaptive crack propagation analysis with the element-free Galerkin method: G.-H. Lee, H.-J. Chung and C.-K. Choi 331

Transient heat conduction analysis in a piecewise homogeneous domain by a coupled boundary and finite element method: I. Guven and E. Madenci 351

Thermoelastic stress field in a piecewise homogeneous domain under non-uniform temperature using a coupled boundary and finite element method: I. Guven and E. Madenci 381

Imposition of boundary conditions by modifying the weighting coefficient matrices in the differential quadrature method: T. C. Fung 405

Minimum weight design of non-linear elastic structures with multimodel buckling constraints: F. Trentadue 433

Finite element computation of sloshing modes in containers with elastic baffle plates: A. Bermúdez, R. Rodríguez and D. Santamarina 447

Two trigonometric quadrature formulae for evaluating hypersingular integrals: P. Kim and U. J. Choi 469

Volume 56 Number 4 • 28 January 2003

Rigid-plastic/rigid-viscoplastic FE simulation using linear programming for metal forming: W. Xu, S. Di and P. Thomson 487

A vertex-based finite volume method applied to non-linear material problems in computational solid mechanics: G. A. Taylor, C. Bailey and M. Cross 507

A numerical integration scheme for special finite elements for the Helmholtz equation: P. Bettess, J. Shirron, O. Laghrouche, B. Peseux, R. Sugimoto and J. Trevelyan 531

Sensitivity and optimization for shape and non-linear boundary conditions in thermal boundary elements: K. Davey and L. D. Clark 553

A comparison of transformation methods for evaluating two-dimensional weakly singular integrals: B. M. Johnston and P. R. Johnston 589

Structured extended finite element methods for solids defined by implicit surfaces: T. Belytschko, C. Parimi, N. Moës, N. Sukumar and S. Usui 609

Volume 56 Number 5 • 7 February 2003

Orthogonal grids around convex bodies using foliations: B. Herrera, F. X. Grau and F. Giralt 637

Computational form-finding of tension membrane structures—Non-finite element approaches: Part 1. Use of cubic splines in finding minimal surface membranes: J. S. Brew and W. J. Lewis 651

Computational form-finding of tension membrane structures—Non-finite element approaches: Part 2. Triangular mesh discretization and control of mesh distortion in modelling minimal surface membranes: J. S. Brew and W. J. Lewis 669

Computational form-finding of tension membrane structures—Non-finite element approaches: Part 3. Comparison of mesh constraint methods: J. S. Brew and W. J. Lewis 685

Filling domains with disks: an advancing front approach: Y. T. Feng, K. Han and D. R. J. Owen 699

A hierarchical finite element for geometrically non-linear vibration of doubly curved, moderately thick isotropic shallow shells: P. Ribeiro 715

An assessment of using the predictor–corrector technique to solve reactive transport equations: H.-P. Cheng, M.-H. Li and J.-R. Cheng 739

Distinctive and fuzzy failure probability analysis of an anisotropic rock mass to explosion load: C. Wu, H. Hao and Y. Zhou 767

Volume 56 Number 6 • 14 February 2003

An inverse radiation problem of simultaneous estimation of heat transfer coefficient and absorption coefficient in participating media: H. M. Park and W. J. Lee 787

On evaluation of shape sensitivities of non-linear critical loads: E. Parente Jr. and L. E. Vaz 809

Application of a new differential quadrature methodology for free vibration analysis of plates: G. Karami and P. Malekzadeh 847

Mesh independent modelling of cracks by using higher order shape functions: E. V. Iarve 869

On numerical analyses in the presence of unstable saturated porous materials: A. Benallal and C. Comi 883

Sensitivity analysis and design optimization of three-dimensional non-linear aeroelastic systems by the adjoint method: K. Maute, M. Nikbay and C. Farhat 911

Volume 56 Number 7 • 21 February 2003

A reproducing kernel method with nodal interpolation property: J.-S. Chen, W. Han, Y. You and X. Meng 935

Non-uniform plastic deformation of micron scale objects: C. F. Niordson and J. W. Hutchinson 961

Voxel-based meshing and unit-cell analysis of textile composites: H. J. Kim and C. C. Swan 977

Mesh deformation using the biharmonic operator: B. T. Helenbrook 1007

Transient analysis of electro-osmotic transport by a reduced-order modelling approach: R. Qiao and N. R. Aluru 1023

On the strong discontinuity approach in finite deformation settings: J. Oliver, A. E. Huespe, M. D. G. Pulido and E. Samaniego 1051

Volume 56 Number 8 • 28 February 2003

Efficient implicit finite element analysis of sheet forming processes: A. H. van den Boogaard, T. Meinders and J. Huétink 1083

Natural hierarchical refinement for finite element methods: P. Krysl, E. Grinspun and P. Schröder 1109

Optimization of thermo-elasto-plastic processes using Eulerian sensitivity analysis: S. Paul, P. Michaleris and J. Y. Shanghvi 1125

Stress intensity factor analysis of interface cracks using X-FEM: T. Nagashima, Y. Omoto and S. Tani 1151

Application of symmetric indirect Trefftz method to free vibration problems in 2D: J. Chang, R. Liu, S. Kuo and W. Yeih 1175

Practical methods for *a posteriori* error estimation in engineering applications: S. Prudhomme, J. T. Oden, T. Westermann, J. Bass and M. E. Botkin 1193

Volume 56 Number 9 • 7 March 2003

Time accurate consistently stabilized mesh-free methods for convection dominated problems: A. Huerta and S. Fernández-Méndez 1225

Guaranteed *a posteriori* error estimation for fully discrete solutions of parabolic problems: T. Strouboulis, I. Babuška and D. K. Datta 1243

Particulate flow simulations using lubrication theory solution enrichment: G. J. Wagner, S. Ghosal and W. K. Liu 1261

An improved crack analysis technique by element-free Galerkin method with auxiliary supports: S.-H. Lee and Y.-C. Yoon 1291

A non-iterative finite element method for inverse heat conduction problems: X. Ling, R. G. Keanini and H. P. Cherukuri 1315

A gradient-based adaptation procedure and its implementation in the element-free Galerkin method: Y. Luo and U. Häussler-Combe 1335

Tetrahedral mesh generation and optimization based on centroidal Voronoi tessellations: Q. Du and D. Wang 1355

Volume 56 Number 10 • 14 March 2003

On a new integration scheme for von-Mises plasticity with linear hardening: F. Auricchio and L. Beirão da Veiga 1375

A study on the convergence of least-squares meshfree method under inaccurate integration: S.-H. Park, K.-C. Kwon and S.-K. Youn 1397

Simulation of high velocity concrete fragmentation using SPH/MLSPH: T. Rabczuk and J. Eibl 1421

Point collocation methods using the fast moving least-square reproducing kernel approximation: D. W. Kim and Y. Kim 1445

Recovering lower bounds of the error by postprocessing implicit residual *a posteriori* error estimates: P. Díez, N. Parés and A. Huerta 1465

A LATIN computational strategy for multiphysics problems: application to poroelasticity: D. Dureisseix, P. Ladevèze and B. A. Schrefler 1489

Earthquake-induced hydrodynamic pressures on a 3D rigid dam–reservoir system using DRBEM and a radiation matrix: Y. M. Fahjan, O. S. Börekçi and M. Erdik 1511

Volume 56 Number 11 • 21 March 2003

Numerical approximation of a thermally driven interface using finite elements: P. Zhao and J. C. Heinrich 1533

Moving element method for train-track dynamics: C. G. Koh, J. S. Y. Ong, D. K. H. Chua and J. Feng 1549

A class of parallel multiple-front algorithms on subdomains: A. Bose, G. F. Carey and V. F. de Almeida 1569

Automatic metric 3D surface mesh generation using subdivision surface geometrical model. Part 1: Construction of underlying geometrical model: C. K. Lee 1593

Automatic metric 3D surface mesh generation using subdivision surface geometrical model. Part 2: Mesh generation algorithm and examples: C. K. Lee 1615

Plotting holographic interferograms for visualization of dynamic results from finite-element calculations: M. Ragulskis, A. Palevicius and L. Ragulskis 1647

Essential algorithms to minimize dynamic effects in using explicit codes for stamping process simulations: W. Hu 1661

Volume 56 Number 12 • 28 March 2003

Investigation into the wrinkling behaviour of thin sheets in the cylindrical cup deep drawing process using bifurcation theory: J. B. Kim, J. W. Yoon and D. Y. Yang 1673

Minimizing dynamic effects while using dynamic codes to simulate binder-set processes: W. Hu 1707

Analysis of nets with hexagonal mesh using triangular elements: D. Priour 1721

Comparison of static response of structures using convex models and interval analysis method: Z. Qiu 1735

Iterative solution of a hybrid method for Maxwell's equations in the frequency domain: J. Edlund, P. Lötstedt and B. Strand 1755

Efficient kinematic joint descriptions for flexible multibody systems experiencing linear and non-linear deformations: J. Ambrósio 1771

Recursive second order convergence method for natural frequencies and modes when using dynamic stiffness matrices: S. Yuan, K. Ye, F. W. Williams and D. Kennedy 1795

Volume 56 Number 13 • 7 April 2003

An efficient artificial compressibility (AC) scheme based on the characteristic based split (CBS) method for incompressible flows: P. Nithiarasu 1815

The boundary contour method for piezoelectric media with linear boundary elements: Q. Wang, G. Wang, Z. Liu and H. Ding 1847

Implicit solid, flow and flow-solid element approaches in blade forging simulation: B. Soltani, K. Mattiasson and A. Samuelsson 1861

A methodology for the generation of low-cost higher-order methods for linear dynamics: M. Mancuso and F. Ubertini 1883

Level set calculations of the evolution of boundaries on a dynamically adaptive grid: V. Sochnikov and S. Efrima 1913

Boundary knot method for 2D and 3D Helmholtz and convection–diffusion problems under complicated geometry: Y. C. Hon and W. Chen 1931

Data structure and algorithms for fast automatic differentiation: I. Tsukanov and M. Hall 1949

Volume 56 Number 14 • 14 April 2003

Special Issue on Computational Failure Mechanics
Guest Editors: F. Armero, P. Steinmann and K. Willam

Preface 1973

A computational model for impact failure with shear-induced dilatancy: Z. Chen, R. Feng, X. Xin and L. Shen 1979

An algorithm to simulate surface creation without element deletion or remeshing: J. M. Gerken, J. G. Bennett and F. W. Smith 1999

Brittle fracture in polycrystalline microstructures with the extended finite element method: N. Sukumar, D. J. Srolovitz, T. J. Baker and J.-H. Prévost 2015

Strongly non-local gradient-enhanced finite strain elastoplasticity: M. G. D. Geers, R. L. J. M. Ubachs and R. A. B. Engelen 2039

An analysis of strain localization in a shear layer under thermally coupled dynamic conditions. Part 1: Continuum thermoplastic models: F. Armero and J. Park 2069

An analysis of strain localization in a shear layer under thermally coupled dynamic conditions. Part 2: Localized thermoplastic models: F. Armero and J. Park 2101

A study on finite elements for capturing strong discontinuities: J. Oliver, A. E. Huespe and E. Samaniego 2135

Rigid–plastic interface for an embedded crack: B. W. Spencer and P. B. Shing 2163

Effect of particle cracking on elastoplastic behaviour of metal matrix composites: L. Z. Sun, H. T. Liu and J. W. Ju 2183

Failure analysis of solder joints with a damage-coupled viscoplastic model: Y. Wei, C. L. Chow, M. K. Neilsen and H. E. Fang 2199

Time finite elements and error computation for (visco)plasticity with hardening or softening: F. Larsson, K. Runesson and P. Hansbo 2213

Geometrically non-linear anisotropic inelasticity based on fictitious configurations: Application to the coupling of continuum damage and multiplicative elasto-plasticity: A. Menzel and P. Steinmann 2233

Volume 56 Number 15 • 21 April 2003

Post-buckling analysis of imperfect laminates using finite strips based on a higher-order plate theory: G. P. Zou and S. S. E. Lam 2265

Arbitrary placement of local meshes in a global mesh by the interface-element method (IEM): H.-G. Kim 2279

An adaptive non-conforming finite-element method for Reissner–Mindlin plates: C. Carstensen and K. Weinberg 2313

Moving least squares differential quadrature method and its application to the analysis of shear deformable plates: K. M. Liew, Y. Q. Huang and J. N. Reddy 2331

Numerical model of electrical potential within the human head: J. B. Nixon, P. E. Rasser, M. D. Teubner, C. R. Clark and M. J. Bottema 2353

A Trefftz approach to computational mechanics: Ch. Hochard 2367

A refined non-linear non-conforming triangular plate/shell element: Y. X. Zhang and Y. K. Cheung 2387
